DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/113,053, filed on 7/10/1998. ***Claim Rejections - 35 USC § 102***
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-14 and 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsui et al. (6,062,667).

Matsui et al. discloses (Figures 5 and 13) a printing cartridge (51) that is releasably engagable with a printing device having a liner reader (38) for reading a barcode (37) and a central processor unit (CPU in Fig. 17) capable of interpreting data carried on the barcode, the printing cartridge comprising: a housing (21); a media colorant supply arrangement (340) positioned within the housing and containing a supply of media colorant; a feed mechanism

(342) for feeding the media colorant to a printing mechanism; and a barcode (37) depicted on the housing, the barcode being readable by the linear reader (38) when the cartridge is engaged with the printing device and a defining a code representing data relating the media colorant.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsui et al. in view of Capps et al. (5,997,124).

Matsui et al. discloses everything claimed except for using a lookup table. Capps et al. discloses (col. 4, lines 43-64) an inkjet printer that uses a lookup table to determine driving parameters. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide a lookup table, as taught by Capps et al., in the printer of Matsui et al., in order to adjust for changes in droplet velocity to reduce banding in the image.
